**Redefining Sovereignty in International Economic Law** Wenhua Shan 2008-04-21 The concept of state sovereignty is increasingly challenged by a proliferation of international economic instruments and major international economic institutions. States from both the south and north are re-examining and debating the extent to which they should cede control over their economic and social policies to achieve global economic efficiency in an interdependent world. International lawyers are seriously rethinking the subject of state sovereignty, in relation to the operation of the main international economic institutions, namely the WTO, the World Bank and the International Monetary Fund (IMF). The contributions in this volume, bringing together leading scholars from

the developed and developing worlds, take up the challenge of debating the meaning of sovereignty and the impact of international economic law on state sovereignty. The first part looks at the issues from the perspectives of general international law, international economic law and legal theory. Part two discusses the impact of trade liberalisation on the sovereignty of both industrialised and developing states and Part three concentrates on the challenge to state sovereignty created by the proliferation of investment treaties and the significant recent growth of investment treaty based arbitration cases. Part four focuses on the domestic and international effects of international financial intermediaries and markets. Part five explores the tensions and intersections between the international

regulation of trade and investment, international human rights and state sovereignty

Principles of International Economic Law

Matthias Herdegen 2016 This fully updated new edition provides insight into the legal framework of international economic relations. Comprising the law of the World Trade Organization, investment law, and international monetary law, this book highlights the context of human rights, good governance, environmental protection, and development.

**The Misery of International Law** John

Linarelli 2018 Poverty, inequality, and dispossession accompany economic globalization. Bringing together three international law scholars, this book addresses how international law and its regimes of trade, investment, finance, as well as human rights, are implicated in the construction of misery, and how international law is producing, reproducing, and embedding injustice and narrowing the alternatives that might really serve humanity.

Adopting a pluralist approach, the authors confront the unconscionable dimensions of the global economic order, the false premises upon which they are built, and the role of international law in constituting and sustaining them. Combining insights from radical critiques, political philosophy, history, and critical development studies, the book explores the pathologies at work in international economic law today. International law must abide by the requirements of justice if it is to make a call for compliance with it, but this work claims it drastically fails to do so. In a legal order structured around neoliberal ideologies rather than principles of justice, every state can and does grab what it can in the economic sphere on the basis of power and interest, legally so and under colour of law. This book examines how international law on trade and foreign investment and the law and norms on global finance has been shaped to benefit the rich and powerful at the expense of others. It studies how

a set of principles, in the form of a New International Economic Order (NIEO), that could have laid the groundwork for a more inclusive international law without even disrupting its market-orientation, were nonetheless undermined. As for international human rights law, it is under the terms of global capitalism that human rights operate. Before we can understand how human rights can create more just societies, we must first expose the ways in which they reflect capitalist society and how they assist in reproducing the underlying terms of immiseration that will continue to create the need for human rights protection. This book challenges conventional justifications of economic globalization and eschews false choices. It is not about whether one is "for" or "against" international trade, foreign investment, or global finance. The issue is to resolve how, if we are to engage in trade, investment, and finance, we do so in a manner that is accountable to persons whose lives are

affected by international law. The deployment of human rights for their part must be considered against the ubiquity of neoliberal globalization under law, and not merely as a discrete, benevolent response to it.

*Principles of International Investment Law*

Rudolf Dolzer 2022-01-13 This book outlines the principles behind the international law of foreign investment. The main focus is on the law governed by bilateral and multilateral investment treaties. It traces the purpose, context, and evolution of the clauses and provisions characteristic of contemporary investment treaties, and analyses the case law, interpreting the issues raised by standard clauses. Particular consideration is given to broad treaty-rules whose understanding in practice has mainly been shaped by their interpretation and application by international tribunals. In addition, the book introduces the dispute settlement mechanisms for enforcing investment law, outlining the operation of

Investor-State arbitration. Combining a systematic analytical study of the texts and principles underlying investment law with a jurisprudential analysis of the case law arising in international tribunals, this book offers an ideal introduction to the principles of international investment law and arbitration, for students, scholars, and practitioners alike.

Judging the State in International Trade and Investment Law Leïla Choukroune 2016-12-10

This book addresses concerns with the international trade and investment dispute settlement systems from a statist perspective, at a time when multilateralism is deeply questioned by the forces of mega-regionalism and political and economic contestation. In covering recent case law and theoretical discussions, the book's contributors analyze the particularities of statehood and the limitations of the dispute settlement systems to judge sovereign actors as autonomous regulators. From a democratic deficit coupled with a deficit of legitimacy in

relation to the questionable professionalism, independence and impartiality of adjudicators to the lack of consistency of decisions challenging essential public policies, trade and investment disputes have proven controversial. These challenges call for a rethinking of why, how and what for, are States judged. Based on a "sovereignty modern" approach, which takes into account the latest evolutions of a globalized trade and investment law struggling to put people's expectations at its core, the book provides a comprehensive framework and truly original perspective linking the various facets of "judicial activity" to the specific yet encompassing character of international law and the rule of law in international society. In doing so, it covers a large variety of issues such as global judicial capacity building and judicial professionalism from an international and domestic comparative angle, trade liberalisation and States' legitimate rights and expectations to protect societal values, the legal challenges of

being a State claimant, the uses and misuses of imported legal concepts and principles in multidisciplinary adjudications and, lastly, the need to reunify international law on a (human) rights based approach.

**Research Handbook on Global Justice and International Economic Law** John Linarelli

2013-09-30 The fairness of institutions of global economic governance ranks among the most pressing issues of our time.

**Permanent Sovereignty over Natural**

**Resources** Marc Bungenberg 2015-04-15 Fifty years after the adoption of the Declaration on Permanent Sovereignty over Natural Resources by the General Assembly of the United Nations in December 1962, this volume assesses the evolution of the principle of permanent sovereignty over natural resources into a principle of customary international law as well as related developments. International environmental and human rights law leave unresolved questions regarding the limitations

of this principle, e.g. extraterritorial and international influences such as the applicable criminal and tort law, as well as the extraterritorial and international promotion of good governance, including transparency obligations.

**International Economic Law after the Global Crisis** Chin Lim 2015-04-30 This collection

explores the theme of fragmentation within international economic law following the global financial crisis.

*Elgar Encyclopedia of International Economic*

*Law* Krista Nadakavukaren Schefer 2025-08-28

This revised and expanded Encyclopedia is the new benchmark and flagship reference work for the study of international economic law. A comprehensive resource, its pages present the breadth of the field in a real-world context.

Organized thematically rather than alphabetically, the Encyclopedia includes four significant thematic sections: the foundations, architecture and principles of international

economic law; regulatory framework; regulatory areas; and regulatory challenges. Including updated and new entries, traditional international economic law topics are now supplemented by coverage of critical perspectives and a broader range of newly developing areas such as taxation, sustainability, and digitalization. Concepts and rules of trade, investment, finance, competition, and international tax law are found alongside entries examining how international economic law impacts on environmental protection, labor standards, development, and human rights. Embedded within its own legal context, each concise entry presents an accessible and condensed understanding of what it means and why it is significant. Contributors offer insight into how institutions interact with each other and other legal systems, in addition to providing individual overviews of their history, structure, principles and procedures. Entries are followed by selected references suggesting directions for

further study. Completely new to this edition is an entire section of extended entries on specific jurisdictions focusing on how these contribute to and engage with international economic law. These longer pieces describe the national legal frameworks responsible for developing international policies on trade investment, financial regulation, and tax, offering insight into how international rules actually work at the national level. Key Features: Concise, structured entries from top experts and new voices in the field Organised thematically, covering newly developing areas of international economic law Selected references for further study *Economic Principles of Law* Cento G. Veljanovski 2007-05-31 *Economic Principles of Law*, first published in 2007, applies economics to the doctrines, rules and remedies of the common law. In plain English and using non-technical analysis, it offers an introduction and exposition of the 'economic approach' to law - one of the most exciting and vibrant fields of legal

scholarship and applied economics. Beginning with a brief history of the field, it sets out the basic economic concepts useful to lawyers, and applies these to assess the core areas of the common law - property, contract, tort and crime - with particular emphasis on their doctrinal structure and remedies. This is done using leading cases drawn from the birthplace of the common law (England & Wales) and other common law jurisdictions. The book serves as a primer to the wider use of economics which has become increasingly important for law students, lawyers, legislators, regulators and those concerned with our legal system generally.

**Principles of International Economic Law, 3e** Matthias Herdegen 2024-07-04 Herdegen's Principles of International Economic Law has established itself as a leading textbook in the field. This fully updated third edition covers areas of growing relevance in international economic law, including corporate social responsibility, challenges for WTO law, the

impact of human rights and environmental law, and cryptocurrencies.  
European Yearbook of International Economic Law 2019 Marc Bungenberg 2020-01-13 Volume 10 of the EYIEL focusses on the relationship between transnational labour law and international economic law on the occasion of the 100th anniversary of the International Labour Organisation (ILO). As one of the oldest UN Agencies, the ILO has achieved considerable progress with respect to labour rights and conditions. The contributions to EYIEL Volume 10 assess these achievements in light of current and future challenges. The ILO's core instruments and legal documents are analysed and similarly the impact labour standards have on trade and investment agreements. In its regional section, EYIEL 10 addresses recent developments in the US and the EU, including the US' trade policy strategy towards China as well as the reform of the NAFTA. In its part on institutions, EYIEL 10 focusses inter alia on the

role of the rule of law in relation to current practices of the International Monetary Fund and of the WTO's Appellate Body as an international court. Furthermore, it provides an overview of current cases before the WTO. Finally, the volume entails a section with review essays on recently published books in the field of international economic law and international investment law.

**Principles of International Trade and Investment Law** Mitchell, Andrew D.

2021-09-21 This essential book discusses a wide range of important legal principles such as procedural fairness and reasonableness in the context of international trade and investment law. Using comparative methodology, the authors examine how those principles are reflected in treaties and how they are employed by adjudicators resolving disputes.

**General Principles of Law and International Due Process** Charles T. Kotuby, Jr. 2017-02-15  
Article 38 of the Statute of the International

Court of Justice defines "international law" to include not only "custom" and "convention" between States but also "the general principles of law recognized by civilized nations" within their municipal legal systems. In 1953, Bin Cheng wrote his seminal book on general principles, identifying core legal principles common to various domestic legal systems across the globe. This monograph summarizes and analyzes the general principles of law and norms of international due process, with a particular focus on developments since Cheng's writing. The aim is to collect and distill these principles and norms in a single volume as a practical resource for international law jurists, advocates, and scholars. The information contained in this book holds considerable importance given the growth of inter-state intercourse resulting in the increased use of general principles over the past 60 years. General principles can serve as rules of decision, whether in interpreting a treaty or contract,

determining causation, or ascertaining unjust enrichment. They also include a core set of procedural requirements that should be followed in any adjudicative system, such as the right to impartiality and the prohibition on fraud.

Although the general principles are, by definition, basic and even rudimentary, they hold vital importance for the rule of law in international relations. They are meant not to define a rule of law, but rather the rule of law.

International Economic Law with a Human Face

Friedl Weiss 2023-12-18 International Economic Law with a Human Face addresses a vital question in contemporary international economies: the design, structure and content of the legal and institutional framework within an increasingly globalized civil society and market economy. It is based on the belief that liberalized global markets cannot be expected to provide the public goods required to secure the *acquis communautaire* for human rights worldwide, let alone to extend those rights to

peoples hitherto deprived of their benefits.

Scholars from Europe, America, Asia and Australia examine a variety of aspects of relevant state practice in a fresh and stimulating manner. They combine 'international social critique' of state practice with ideas for 'social engineering', offering critical legal analysis and ideas about policy options for setting standards to induce legal change and development.

International Economic Law with a Human Face is a 'user-friendly' book. Twenty-seven chapters are sub-titled and arranged under three main headings: Towards a new human and economic order (chapters 1-8); Trade, environmental protection and resource management (chapters 9-18); and Investment and finance (chapters 19-27). It also contains a detailed Table of Contents and an Index.

**Principles of International Economic Law**

Matthias Herdegen 2016-10-06 Principles of International Economic Law provides a comprehensive overview of the central topics in

international economic law, with an emphasis on the interplay between the different economic and political interests on both the international and domestic levels. Following recent tendencies, the book sets the classic topics of international economic law, like WTO law, investment protection, commercial law and monetary law in context with aspects of human rights, environmental protection and the legitimate claims of developing countries. The book draws a concise picture of the architecture of international economic law with all its complexities, without getting lost in fragmented details. Providing a perfect introductory text to the field of international economic law, the book thoroughly analyses legal developments within their wider political, economic, or social context. Topics covered range from codes of conduct for multinational enterprises, to the human rights implications of the exploitation of natural resources. The book demonstrates the economic foundations and economic implications of legal

frameworks. It puts into profile the often complex relationship between, on the one hand, international standards on liberalization and economic rationality and, on the other, state sovereignty and national preferences. It describes the new forms of economic cooperation which have developed in recent decades, such as the growing number of transnational companies in the private sector, and forms of cooperation between states such as the G8 or G20. This fully updated second edition covers new aspects and developments including the growing importance of corporate social responsibility, mega-regional-agreements like CETA, TTIP, and TPP, trade and investment related aspects of human rights law.

*International Economic Law* Leïla Choukroune  
2021-07-22 An examination of the core principles, landmark disputes, and modern developments in IEL reflecting a global approach.

International Economic Law Andreas F.

Lowenfeld 2008 As conflict and cooperation among states turn to an ever greater extent on economic issues, this fully updated and expanded second edition presents a comprehensive exploration of the legal foundations of the international economy. It not only examines the current status of the law, but also explores the origins, political tensions and development of outcomes that are often difficult to comprehend. Lowenfeld examines the major elements of economic law in the international arena including the World Trade Organization and its antecedents; dumping, subsidies, and other devices that alter the market; the International Monetary System, including the collapse of the Bretton Woods system; the debt of developing countries; the law of foreign direct investment, including changing perceptions of the rights of host states and multinational enterprises; and economic sanctions. The book also contains chapters on competition law, environmental law, and new chapters on

intellectual property and the various forms of arbitration; demonstrating how these subjects fit into the framework of international economic law. Professor Lowenfeld brings to his task a lifetime of practice and teaching experience to produce a book that will be of use to international lawyers and non-specialists alike.

**The Emerging Principles of International Competition Law**

Chris Noonan 2008-01-17 As national competition laws proliferate and enforcement efforts increase, the international competition law system is increasingly beset with conflicts between States with competing interests. This book explores ways to reduce conflicts, contending that an international competition law system is evolving.

**International Law in Financial Regulation and Monetary Affairs**

Thomas Cottier 2012-10-04 Analysing the emerging international legal framework governing financial institutions and markets, including monetary policies and monetary regulation, this book addresses the

cross border issues that arise within this area. It highlights the lack of formal international law present, and shows how this contributed to the global financial crisis.

### **EU External Action in International**

**Economic Law** Mads Andenas 2020-09-25 The topic of this book is the external action of the EU within international economic law, with a special focus on investment law. The aim of the volume is to provide the reader with an appraisal of the most recent trends and developments that have characterised a field that has been rapidly evolving and in which the EU has imposed itself as a leading actor. The book is aimed at academics, practitioners and graduate students as well as at EU officials and judges, all of whom should find the subject matter discussed useful for keeping updated on a scholarly discussion of relevance to case law. Mads Andenas is Professor of Law at the Faculty of Law of the University of Oslo in Norway. Luca Pantaleo is Doctor of Law and Senior Lecturer in

International and European Law at The Hague University of Applied Sciences in The Netherlands. Matthew Happold is Professor of Law at the Université du Luxembourg in Luxembourg. Cristina Contartese is Lecturer in Law at the European Law and Governance School in Athens, Greece.

### *Fundamental Principles of Law and Economics*

Alan James Devlin 2015 This textbook places the relationship between law and economics in its international context, explaining the fundamentals of this increasingly important area of teaching and research in an accessible and straightforward manner. In presenting the subject, Alan Devlin draws on the neoclassical tradition of economic analysis of law while also showcasing cutting-edge developments, such as the rise of behavioural economic theories of law. Key features of this innovative book include: case law, directives, regulations, and statistics from EU, UK, and US jurisdictions are presented clearly and contextualised for law students,

showing how law and economics theory can be understood in practice; succinct end- of-chapter summaries highlight the essential points in each chapter to focus student learning; further reading is provided at the end of each chapter to guide independent research. Making use of tables and diagrams throughout to facilitate understanding, this text provides a comprehensive overview of law-and-economics that is ideal for those new to the subject and for use as a course text for law-and-economics modules.

### **Reclaiming Development in the World Trading System** Yong-Shik Lee 2006-01-30

Prevalent poverty in less developed countries is one of the most pressing issues of our time and economic development in these countries is necessary to bring them out of poverty. As seen in the successful development cases of East Asian countries, international trade is closely relevant to economic development, and export facilitation and effective industrial policies have

been the key to the successful development. Current GATT/WTO provisions facilitating development are insufficient and some WTO provisions prevent developing countries from adopting effective development policies. This book is the first attempt to suggest a comprehensive modification of the current GATT/WTO disciplines to better facilitate development. The book also examines the need to elevate the level of regulatory treatment of development issues by the WTO and proposes the Agreement on Development Facilitation and the Council for Trade and Development within the WTO.

*Legal Principles in WTO Disputes* Andrew D. Mitchell 2011-11-10 Principles play a crucial role in any dispute settlement system, and the World Trade Organization (WTO) is no exception. However, WTO Panels and the Appellate Body have been too timid in using principles, sometimes avoiding their use when appropriate and at other times using them

without fully acknowledging that they are doing so. Perhaps more worryingly, these bodies often fail to delve deeply enough into principles. They tend to overlook key questions such as the legal basis for using a given principle, whether the principle is being used in an interpretative manner or as applicable law and the meaning of the principle in public international law. This book establishes a framework for addressing these questions. The use of such a framework should allay fears and misconceptions about the use of principles and ensure that they are used in a justifiable manner, improving the quality of dispute settlement in the WTO.

#### Implementing International Economic Law

2011-09-20 International economic law is very likely to be one of the most significant areas of law throughout the twenty-first century. As is well-known, it is an inter-disciplinary area of law covering very broad and different fields since it deals with all economic aspects of relations among the subjects of international law. In

today's world, the relations among States, international organisations and individuals have dramatically intensified. It is a sine qua non requirement that the conflicts or cases deriving from the application of the principles of international economic law must be solved by the dispute settlement mechanisms of international law, which are crucial both for the protection of international peace and security on the one hand and for the implementation of international economic law on the other. The book focuses on the relationship between the rules of public international law and international economic law from the point of view of dispute settlement mechanisms. It consists of the following Chapters: International Economic Law; New Challenges and Issues in International Finance Law; Dispute Settlement in International Trade Law and Dispute Settlement in International Investment Law. Finally, the book draws some general conclusions and provides certain suggestions for

future research and practice in the field.

*Compensation and Restitution in Investor-State Arbitration* Borzu Sabahi 2011-06-30 This book examines the history, principles, and practice of awarding compensation and restitution in investor-State arbitration disputes, which are initiated under investment treaties. The principles discussed may be applied to all international law cases where damage to property is an issue. The book starts by tracing the roots of the applicable international legal principles to Roman law, and from there follows their evolution through the European law of extra-contractual liability and eventually through the Chorzów Factory case to principles of compensation and restitution in the modern law of international investment. The greater part of the book is then dedicated to examination of the modern application of these principles, focusing on the jurisprudence of international tribunals under various arbitral rules such as ICSID and UNCITRAL Rules. Monetary compensation as

the prevalent form of remedy sought and awarded in investor-State disputes is discussed in more detail, including topics such as the amount of compensation for damage resulting from breach of investment treaties or for lawful expropriation of foreign investor's property, a brief overview of valuation methods, supplementary compensation for moral damages, interest, costs, and currency fluctuations as well as various principles that may limit the amount of recoverable compensation, such as causation. A full chapter is dedicated to the discussion of the theory and practice of awarding restitution in investor-State disputes. The book also covers the general principle of reparation in international law as applied in investor-State arbitrations. The topics discussed cover all the theoretical as well as practical issues which may be raised in awarding compensation and restitution in investment treaty disputes between States and foreign investors.

### **Reflections on the Constitutionalisation of International Economic Law**

2013-12-09 This book collects a large number of essays written in honour of Professor Ernst-Ulrich Petersmann by his friends, colleagues and former students. The respective contributions cover the fields of international economic law, international constitutional law/transnational constitutionalism, EU law and human rights. The broad thematic scope of this book mirrors the extremely large field of interests of the jubilarian. Paying tribute to a particular trait of Professor Petersmann's character who was always both a dogmatic thinker and a curious researcher, the authors try to cover both structural issues of law as well as most recent developments, in particular in the field of international economic law. "Construing" the constitution of international economic law, in both senses of this activity, was an aim throughout Professor Petersmann's academic career and this goal stands also at the heart of

this book.

### *Documents in International Economic Law*

Christian J. Tams 2012-08-30 Bringing together all the most important treaties and materials in international trade law, investment law, and financial law, this book will be an invaluable resource to both students and practitioners of international economic law.

### **International Economic Dispute Settlement**

Manfred Elsig 2021-07-22 The post-Cold War era has seen an unprecedented move towards more legalization in international cooperation and a growth of third-party dispute settlement systems. WTO panels, the Appellate Body and investor-state dispute settlement cases have received increasing attention beyond the core trade and investment constituencies within governments. Scrutiny by business, civil society, academia, and trade and investment experts has been on the rise. This book asks whether we observe a transformation or a demise of existing institutions and mechanisms to adjudicate

disputes over trade or investment. It makes a contribution to the question in which direction international economic dispute settlement is heading in times of change, uncertainty and increasing economic nationalism. In order to do so, it brings together chapters written by leading researchers and experts in law and political science to address the challenges of settling disputes in the global economy and to sketch possible scenarios ahead of us.

**Principles of International Economic Law**

Matthias Herdegen 2013-01-10 A comprehensive insight into the legal framework of international economic relations, comprising the law of the World Trade Organization, investment law, and international monetary law, this book highlights the context of human rights, good governance, environmental protection, development, and the role of the G20 and multinationals.

Principles of International Economic Law, 3e

Matthias Herdegen 2024-07-04 Herdegen's Principles of International Economic Law has established itself as a leading textbook in the field. This fully updated third edition covers areas of growing relevance in international economic law, including corporate social responsibility, challenges for WTO law, the impact of human rights and environmental law, and cryptocurrencies.

General Principles of European Private

International Law Stefan Leible 2016-02-22

European private international law, as it stands in the Rome I, II, and III Regulations and the recent Succession Regulation, presents manifold risks of diverging judgments despite seemingly harmonised conflict of law rules. There is now a real danger, in light of the rapid increase in the number of legal instruments of the European Union on conflict of laws, that European private international law will become incoherent. This collection of essays by twenty noted scholars in the field sheds clear light on the pivotal issues of whether a set of overarching rules (a 'general part') is required, whether an EU regulation is the adequate legal instrument for such a purpose, which general questions such an instrument should address, and what solutions such an instrument should provide. In analysing the possible emergence of general principles in European private international law over the past years, the contributors discuss such issues and

factors as the following: - the relationship between conflict of laws and recognition; - the room for party autonomy; - the concept of habitual residence; - adaptation when interplay between different laws leads to deadlock; - public policy exceptions; - the desirability of a general escape clause; - the classic topics of characterisation, incidental question, and renvoi; and - right to appeal in case of errors in the application of foreign law. Practitioners dealing with these notoriously difficult cases will welcome this in-depth treatment of the issues, as will interested policymakers throughout the EU Member States and at the EU level itself. Scholars will discover an incomparable comparative analysis leading to expert recommendations in European private international law, opening the way to an effective European framework in this area.

**An Introduction to International Law** Joseph Gabriel Starke 1963

*China's Influence on Non-Trade Concerns in*

*International Economic Law* Paolo Farah

2016-10-14 This volume examines the range of Non-Trade Concerns (NTCs) that may conflict with international economic rules and proposes ways to protect them within international law and international economic law. Globalization without local concerns can endanger relevant issues such as good governance, human rights, right to water, right to food, social, economic, cultural and environmental rights, labor rights, access to knowledge, public health, social welfare, consumer interests and animal welfare, climate change, energy, environmental protection and sustainable development, product safety, food safety and security. Focusing on China, the book shows the current trends of Chinese law and policy towards international standards. The authors argue that China can play a leading role in this context: not only has China adopted several reforms and new regulations to address NTCs; but it has started to play a very relevant role in international

negotiations on NTCs such as climate change, energy, and culture, among others. While China is still considered a developing country, in particular from the NTCs' point of view, it promises to be a key actor in international law in general and, more specifically, in international economic law in this respect. This volume assesses, taking into consideration its special context, China's behavior internally and externally to understand its role and influence in shaping NTCs in the context of international economic law.

**International Economic Law** Giovanna Adinolfi 2016-12-29 This volume scrutinises the main challenges faced by States in their current international economic relations from an interdisciplinary perspective. It combines legal research with political and economic analysis and favours dialogue among scientific disciplines. Readers are offered a series of in-depth studies on a rich variety of topics: how to reconcile States' interest to benefit from

economic liberalization with their need to pursue social goals (such as the protection of human rights or of the environment); recent developments under WTO law and regional integration processes; international cooperation in the energy sector; national regulatory developments in the banking sector, sovereign wealth funds and investor-State arbitration.

**New Directions in International Economic Law** Todd Weiler 2011-08-11 Dedicated to the memory of a path-breaking international lawyer, Thomas Wälde, this volume offers an eclectic mix of contributions from leading academics and practitioners. Topics include: foreign direct investment, dispute settlement, corporate responsibility, economic development, natural resources, and private international law.

*Legal and Economic Principles of World Trade Law* Henrik Horn 2013-04-22 The World Trade Organization (WTO) Agreement covers international commerce in goods and services including measures that directly affect trade,

such as import tariffs and quotas, and almost any type of internal measure with an impact on trade. Legal and Economic Principles of World Trade Law contributes to the analysis of the texts of World Trade Law in law and economics, reporting work done to identify improvements to the interpretation of the Agreement. It starts with background studies, the first summarizes The Genesis of the GATT, which highlights the negotiating history of the GATT 1947-8; the second introduces the economics of trade agreements. These are followed by two main studies. The first, authored by Bagwell, Staiger and Sykes, discusses legal and economic aspects of the GATT regulation of border policy instruments, such as import tariffs and import quotas. The second, written by Grossman, Horn and Mavroidis, focuses on the core provision for the regulation of domestic policy instruments - the National Treatment principles in Art. III GATT.

### **General Principles of Law and International**

**Investment Arbitration** Andrea Gattini  
2018-05-29 General Principles of Law in Investment Arbitration surveys the function of general principles in the field of international investment law, particularly in investment arbitration. The authors' analysis provides a representative case study of how this informal source operates alongside and in the absence of other sources of applicable law. The contributions are divided into two parts, devoted respectively to substantive principles and procedural ones. The principles discussed in the book are selected for their currency in the practice, their contested nature and their relevance.
