Oral Literature in Africa Ruth Finnegan 2012 Ruth Finnegan's Oral Literature in Africa was first published in 1970, and since then has been widely praised as one of the most important books in its field. Based on years of fieldwork, the study traces the history of storytelling across the continent of Africa. This revised edition makes Finnegan's ground-breaking research available to the next generation of scholars. It includes a new introduction, additional images and an updated bibliography, as well as its original chapters on poetry, prose, "drum language" and drama, and an overview of the social, linguistic and historical background of oral literature in Africa. This book is the first volume in the World Oral Literature Series, an ongoing collaboration between OBP and World Oral Literature Project. A free online archive of recordings and photographs that Finnegan made during her fieldwork in the late 1960s is hosted by the World Oral Literature Project (<http://www.oralliterature.org/collections/rfinnegan001.html>) and can also be accessed from publisher's website.

Expanding Tertiary Education for Well-Paid Jobs Andreas Blom 2016-06-02 Expanding Tertiary education with quality, relevance and equity is one of the most decisive challenges for Kenya's future, including the achievement of the ideals of the 2010 Constitution and, especially, its 2030 vision, which aims at transforming Kenya into a "newly industrializing, middle income, globally competitive and prosperous country?". That is because tertiary education can contribute in a critical manner to successfully overcome several of the country's challenges. This book provide analysis and policy recommendations to Government of Kenya, tertiary education leaders and the many stakeholders on managing the massive tertiary education expansion facing the country. This book, first, discusses the motivation for the analysis and its choice of three critical topics: quality and relevance; governance, and student financing. Secondly, it reviews findings on each area, and, third, it ends with a set of policy recommendations.

Characteristics of Hawaiian Volcanoes Taeko Jane Takahashi Characteristics of Hawaiian Volcanoes establishes a benchmark for the current understanding of volcanism in Hawaii, and the articles herein build upon the elegant and pioneering work of Dutton, Jagger, Steams, and many other USGS and academic scientists. Each chapter synthesizes the lessons learned about a specific aspect of volcanism in Hawaii, based largely o continuous observation of eruptive activity and on systematic research into volcanic and earthquake processes during HVO's first 100 years. Learner-Centered Teaching Maryellen Weimer 2008-05-02 In this much needed resource, Maryellen Weimer-one of the nation's most highly regarded authorities on effective college teaching-offers a comprehensive work on the topic of learner-centered teaching in the college and university classroom. As the author explains, learner-centered teaching focuses attention on what the student is learning, how the student is learning, the conditions under which the student is learning, whether the student is retaining and applying the learning, and how current learning positions the student for future learning. To help educators accomplish the goals of learner-centered teaching, this important book presents the meaning, practice, and ramifications of the learner-centered approach, and how this approach transforms the college classroom environment. Learner-Centered Teaching shows how to tie teaching and curriculum to the process and objectives of learning rather than to the content delivery alone.

A Research Review of Interventions to Increase the Persistence and Resilience of Coral Reefs National Academies of Sciences, Engineering, and Medicine 2019-04-05 Coral reef declines have been recorded for all major tropical ocean basins since the 1980s, averaging approximately 30-50% reductions in reef cover globally. These losses are a result of numerous problems, including habitat destruction, pollution, overfishing, disease, and climate change. Greenhouse gas emissions and the associated increases in ocean temperature and carbon dioxide (CO2) concentrations have been implicated in increased reports of coral bleaching, disease outbreaks, and ocean acidification (OA). For the hundreds of millions of people who depend on reefs for food or livelihoods, the thousands of communities that depend on reefs for wave

protection, the people whose cultural practices are tied to reef resources, and the many economies that depend on reefs for fisheries or tourism, the health and maintenance of this major global ecosystem is crucial. A growing body of research on coral physiology, ecology, molecular biology, and responses to stress has revealed potential tools to increase coral resilience. Some of this knowledge is poised to provide practical interventions in the short-term, whereas other discoveries are poised to facilitate research that may later open the doors to additional interventions. A Research Review of Interventions to Increase the Persistence and Resilience of Coral Reefs reviews the state of science on genetic, ecological, and environmental interventions meant to enhance the persistence and resilience of coral reefs. The complex nature of corals and their associated microbiome lends itself to a wide range of possible approaches. This first report provides a summary of currently available information on the range of interventions present in the scientific literature and provides a basis for the forthcoming final report.

Fisheries of the Pacific Islands R. D. Gillett 2018

Coral Reefs of the USA Bernhard M. Riegl 2016-08-23 Coral Reefs of the USA provides a complete overview of the present status of knowledge regarding all coral reef areas within the USA and its territories. It is written by the most experienced authorities in their fields and geographic areas. Stretching from the Caribbean to the western Pacific, the coral reefs of the USA span extensive geographic and biotic diversity, occur in a wide variety of geomorphological settings, and provide a representative cross-section of Holocene reef-building. This book will therefore be of broad general interest. For the first time, complete scholarly reviews are given for the geology, geomorphology and the biology of reefs encompassing a vast area stretching from the Mariana Islands in the west, Samoa in the south, Hawaii in the north and the Virgin Islands in the east. This book is not a status report, but will provide up-to-date information about stressors and the biotic responses of the reefs, as well as the geological explanations why these reefs exist in the first place. It will be an invaluable baseline-reference for all those who are engaged in research or management of these coral reefs or to those who simply enjoy being well-informed about one of the most iconic ecosystems of the USA.

Fisheries in the Economies of the Pacific Island Countries and Territories Robert Gillett 2009-01-01 The fishing industry benefits the people and economies of the Pacific in various ways but the full value of these benefits is not reflected in the region's statistics. Records may be maintained but they are not complete, or accurate, or comparable. The research summarized in this report reaffirms the importance of this sector to the economies and societies of the Pacific island countries. The research reveals that the full value of fisheries is likely to have eluded statisticians, and therefore fisheries authorities, government decision makers, and donors. But its value has never escaped the fisher, fish trader, and fish processor. The difference in appreciation between public and private individuals must raise the question of whether fisheries are receiving adequate attention from the public sector---including the necessary management and protection, appropriate research, development, extension and training, and sufficient investment.

Indigenous Women's Voices Emma Lee 2022-12-22 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com. When Linda Tuhiwai Smith's Decolonizing Methodologies was first published, it ignited a passion for research change that respected Indigenous peoples and knowledges, and campaigned to reclaim Indigenous ways of knowing and being. At a time when Indigenous voices were profoundly marginalised, the book advocated for an Indigenous viewpoint which represented a daily struggle to be heard, and to find its place in academia. Twenty years on, this collection celebrates the breadth and depth of how Indigenous writers are shaping the decolonizing research world today. With contributions from Indigenous female researchers, this collection offers the much needed academic space to distinguish methodological approaches, and overcome the novelty confines of being marginal voices.

Pesticidal Plants: From Smallholder Use to Commercialisation Philip C Stevenson 2020 The global

biodiversity and climate emergencies demand transformative changes to human activities. For example, food production relies on synthetic, industrial and non-sustainable products for managing pests, weeds and diseases of crops. Sustainable farming requires approaches to managing these agricultural constraints that are more environmentally benign and work with rather than against nature. Increasing pressure on synthetic products has reinvigorated efforts to identify alternative pest management options, including plant-based solutions that are environmentally benign and can be tailored to different farmers' needs, from commercial to small holder and subsistence farming. Botanical insecticides and pesticidal plants can offer a novel, effective and more sustainable alternative to synthetic products for controlling pests, diseases and weeds. This Special Issue reviews and reports the latest developments in plant-based pesticides from identification of bioactive plant chemicals, mechanisms of activity and validation of their use in horticulture and disease vector control. Other work reports applications in rice weeds, combination biopesticides and how chemistry varies spatially and influences the effectiveness of botanicals in different locations. Three reviews assess wider questions around the potential of plant-based pest management to address the global challenges of new, invasive and established crop pests and as-yet underexploited pesticidal plants.

Stabilizing Indigenous Languages Northern Arizona University. Center for Excellence in Education 1996 "Stabilizing Indigenous Languages is the proceedings of two symposia held in November 1994 and May 1995 at Northern Arizona University. These conferences brought together language activists, tribal educators, and experts on linguistics, language renewal, and language reforms, and community initiatives to stabilize and revitalize American Indian and Alaska Native languages. Stabilizing Indigenous Languages includes a survey of the historical, current, and projected status of indigenous languages in the United States as well as extensive information on the roles of families, communities, and schools in promoting their use and maintenance. It includes descriptions of successful native language programs and papers by leaders in the field of indigenous language study, including Joshua Fishman and Michael Krauss"--Back cover.

Where We Once Belonged Sia Figiel 2009-03-29 Fiction. A bestseller in New Zealand and winner of the prestigious Commonwealth Prize, Sia Figiel's debut marks the first time a novel by a Samoan woman has been published in the United States. Figiel uses the traditional Samoan storytelling form of su'ifefiloi to talk back to Western anthropological studies on Samoan women and culture. Told in a series of linked episodes, this powerful and highly original narrative follows thirteen-year-old Alofa Filiga as she navigates the mores and restrictions of her village and comes to terms with her own search for identity. A story of Samoan PUBERTY BLUES, in which Gauguin is dead but Elvis lives on -- Vogue Australia. A storytelling triumph -- Elle Australia.

The Writing Revolution Amalia E. Gnanadesikan 2011-09-13 In a world of rapid technological advancements, it can be easy to forget that writing is the original Information Technology, created to transcend the limitations of human memory and to defy time and space. The Writing Revolution picks apart the development of this communication tool to show how it has conquered the world. Explores how writing has liberated the world, making possible everything from complex bureaucracy, literature, and science, to instruction manuals and love letters Draws on an engaging range of examples, from the first cuneiform clay tablet, Egyptian hieroglyphs, and Japanese syllabaries, to the printing press and the text messaging Weaves together ideas from a number of fields, including history, cultural studies and archaeology, as well as linguistics and literature, to create an interdisciplinary volume Traces the origins of each of the world's major written traditions, along with their applications, adaptations, and cultural influences

What Do Science, Technology, and Innovation Mean from Africa? Clapperton Chakanetsa Mavhunga 2017-06-16 Explorations of science, technology, and innovation in Africa not as the product of "technology transfer" from elsewhere but as the working of African knowledge. In the STI literature, Africa has often been regarded as a recipient of science, technology, and innovation rather than a maker of them. In this book, scholars from a range of disciplines show that STI in Africa is not merely the product of "technology transfer" from elsewhere but the working of African knowledge. Their contributions focus on African ways of looking, meaning-making, and creating. The chapter authors see Africans as intellectual agents whose perspectives constitute authoritative knowledge and whose strategic deployment of both endogenous and inbound things represents an African-centered notion of STI. "Things do not (always) mean the same from

everywhere," observes Clapperton Chakanetsa Mavhunga, the volume's editor. Western, colonialist definitions of STI are not universalizable. The contributors discuss topics that include the trivialization of indigenous knowledge under colonialism; the creative labor of chimurenga, the transformation of everyday surroundings into military infrastructure; the role of enslaved Africans in America as innovators and synthesizers; the African ethos of "fixing"; the constitutive appropriation that makes mobile technologies African; and an African innovation strategy that builds on domestic capacities. The contributions describe an Africa that is creative, technological, and scientific, showing that African STI is the latest iteration of a long process of accumulative, multicultural knowledge production. Contributors Geri Augusto, Shadreck Chirikure, Chux Daniels, Ron Eglash, Ellen Foster, Garrick E. Louis, D. A. Masolo, Clapperton Chakanetsa Mavhunga, Neda Nazemi, Toluwalogo Odumosu, Katrien Pype, Scott Remer

No Ordinary Sun: Poems Hone Tuwhare 1973

Building Upon Building Jantje Engels 2016 Forty-five contemporary European architects were given the task to design a fictional building expansion in line with the principles of the existing building -- a relevant question in an era when architecture increasingly seems to occur without the context being taken into account. The result is a collection of dialogues between contemporary architects and the past. A new generation of European architects is looking for rooted values rather than indiscriminate forms. Architecture as evolution, rather than revolution. How can the views that underlie the historical city be interwoven with the stories of the present? This question is answered in 45 designs and four essays.

Colonization and the Origins of Humanitarian Governance Alan Lester 2014-04-17 How did those responsible for creating Britain's nineteenth-century settler empire render colonization compatible with humanitarianism? Avoiding a cynical or celebratory response, this book takes seriously the humane disposition of colonial officials, examining the relationship between humanitarian governance and empire. The story of 'humane' colonial governance connects projects of emancipation, amelioration, conciliation, protection and development in sites ranging from British Honduras through Van Diemen's Land and New South Wales, New Zealand and Canada to India. It is seen in the lives of governors like George Arthur and George Grey, whose careers saw the violent and destructive colonization of indigenous peoples at the hands of British emigrants. The story challenges the exclusion of officials' humanitarian sensibilities from colonial history and places the settler colonies within the larger historical context of Western humanitarianism.

The Soil Underfoot G. Jock Churchman 2014-04-21 The largest part of the world's food comes from its soils, either directly from plants, or via animals fed on pastures and crops. Thus, it is necessary to maintain, and if possible, improve the quality—and hence good health—of soils, while enabling them to support the growing world population. The Soil Underfoot: Infinite Possibilities for a Finite Resource arms readers with historical wisdom from various populations around the globe, along with current ideas and approaches for the wise management of soils. It covers the value of soils and their myriad uses viewed within human and societal contexts in the past, present, and supposed futures. In addition to addressing the technical means of maintaining soils, this book presents a culturally and geographically diverse collection of historical attitudes to soils, including philosophical and ethical frameworks, which have either sustained them or led to their degradation. Section I describes major challenges associated with climate change, feeding the increasing world population, chemical pollution and soil degradation, and technology. Section II discusses various ways in which soils are, or have been, valued—including in film and contemporary art as well as in religious and spiritual philosophies, such as Abrahamic religions, Maori traditions, and in Confucianism. Section III provides stories about soil in ancient and historic cultures including the Roman Empire, Greece, India, Japan, Korea, South America, New Zealand, the United States, and France. Section IV describes soil modification technologies, such as polymer membrane barriers, and soil uses outside commercial agriculture including the importance of soils for recreation and sports grounds. The final section addresses future strategies for more effective sustainable use of soils, emphasizing the biological nature of soils and enhancing the use of "green water" retained from rainfall.

Policy, Experience and Change: Cross-Cultural Reflections on Inclusive Education Len Barton 2009-09-03

This book represents an original and innovative series of insights, ideas and questions concerning inclusive education and cross-cultural understandings. Drawing on historical and cultural material, policy developments, legislation and research findings, the book provides a critical exploration of key factors including inclusive education, human rights, change, diversity and special educational needs. The contributors focus closely on how these factors are defined and experienced within particular societies. Diseases of Coral Cheryl M. Woodley 2016-01-26 Coral disease is quickly becoming a crisis to the health and management of the world's coral reefs. There is a great interest from many in preserving coral reefs. Unfortunately, the field of epizootiology is disorganized and lacks a standard vocabulary, methods, and diagnostic techniques, and tropical marine scientists are poorly trained in wildlife pathology, veterinary medicine, and epidemiology. Diseases of Coral will help to rectify this situation.

Climate Change Impacts on Fisheries and Aquaculture Bruce F. Phillips 2017-09-20 The first comprehensive review of the current and future effects of climate change on the world's fisheries and aquaculture operations The first book of its kind, Climate Change Impacts on Fisheries and Aquaculture explores the impacts of climate change on global fisheries resources and on marine aquaculture. It also offers expert suggestions on possible adaptations to reduce those impacts. The world's climate is changing more rapidly than scientists had envisioned just a few years ago, and the potential impact of climate change on world food production is quite alarming. Nowhere is the sense of alarm more keenly felt than among those who study the warming of the world's oceans. Evidence of the dire effects of climate change on fisheries and fish farming has now mounted to such an extent that the need for a book such as this has become urgent. A landmark publication devoted exclusively to how climate change is affecting and is likely to affect commercially vital fisheries and aquaculture operations globally, Climate Change Impacts on Fisheries and Aquaculture provides scientists and fishery managers with a summary of and reference point for information on the subject which has been gathered thus far. Covers an array of critical topics and assesses reviews of climate change impacts on fisheries and aquaculture from many countries, including Japan, Mexico, South Africa, Australia, Chile, US, UK, New Zealand, Pacific Islands, India and others Features chapters on the effects of climate change on pelagic species, cod, lobsters, plankton, macroalgae, seagrasses and coral reefs Reviews the spread of diseases, economic and social impacts, marine aquaculture and adaptation in aquaculture under climate change Includes special reports on the Antarctic Ocean, the Caribbean Sea, the Arctic Ocean and the Mediterranean Sea Extensive references throughout the book make this volume both a comprehensive text for general study and a reference/guide to further research for fisheries scientists, fisheries managers, aquaculture personnel, climate change specialists, aquatic invertebrate and vertebrate biologists, physiologists, marine biologists, economists, environmentalist biologists and planners.

Autophagy Daniel Klionsky 2003-12-15 Starting in the early 1970s, a type of programmed cell death called

apoptosis began to receive attention. Over the next three decades, research in this area continued at an accelerated rate. In the early 1990s, a second type of programmed cell death, autophagy, came into focus. Autophagy has been studied in mammalian cells for many years. The recent *Treatise on Geomorphology* 2013-02-27 The changing focus and approach of geomorphic research suggests that the time is opportune for a summary of the state of discipline. The number of peer-reviewed papers published in geomorphic journals has grown steadily for more than two decades and, more importantly, the diversity of authors with respect to geographic location and disciplinary background (geography, geology, ecology, civil engineering, computer science, geographic information science, and others) has expanded dramatically. As more good minds are drawn to geomorphology, and the breadth of the peer-reviewed literature grows, an effective summary of contemporary geomorphic knowledge becomes increasingly difficult. The fourteen volumes of this Treatise on Geomorphology will provide an important reference for users from undergraduate students looking for term paper topics, to graduate students starting a literature review for their thesis work, and professionals seeking a concise summary of a particular topic. Information on the historical development of diverse topics within geomorphology provides context for ongoing research; discussion of research strategies, equipment, and field methods, laboratory experiments, and numerical simulations reflect the multiple approaches to understanding Earth's surfaces; and summaries of outstanding research questions highlight future challenges and suggest productive new avenues for research. Our future ability to adapt to geomorphic changes in the critical zone very much hinges upon how well landform scientists comprehend the dynamics of Earth's diverse surfaces. This Treatise on Geomorphology provides a useful synthesis of the state of the discipline, as well as highlighting productive research directions, that Educators and students/researchers will find useful. Geomorphology has advanced greatly in the last 10 years to become a very interdisciplinary field. Undergraduate students looking for term paper topics, to graduate students starting a literature review for their thesis work, and professionals seeking a concise summary of a particular topic will find the answers they need in this broad reference work which has been designed and written to accommodate their diverse backgrounds and levels of understanding Editor-in-Chief, Prof. J. F. Shroder of the University of Nebraska at Omaha, is past president of the QG&G section of the Geological Society of America and present Trustee of the GSA Foundation, while being well respected in the geomorphology research community and having won numerous awards in the field. A host of noted international geomorphologists have contributed state-of-the-art chapters to the work. Readers can be guaranteed that every chapter in this extensive work has been critically reviewed for consistency and accuracy by the World expert Volume Editors and by the Editor-in-Chief himself No other reference work exists in the area of Geomorphology that offers the breadth and depth of information contained in this 14-volume masterpiece. From the foundations and history of geomorphology through to geomorphological innovations and computer modelling, and the past and future states of landform science, no "stone" has been left unturned!

Progress in Food Preservation Rajeev Bhat 2012-03-05 This volume presents a wide range of new approaches aimed at improving the safety and quality of food products and agricultural commodities. Each chapter provides in-depth information on new and emerging food preservation techniques including those relating to decontamination, drying and dehydration, packaging innovations and the use of botanicals as natural preservatives for fresh animal and plant products. The 28 chapters, contributed by an international team of experienced researchers, are presented in five sections, covering: Novel decontamination techniques Novel preservation techniques Active and atmospheric packaging Food packaging Mathematical modelling of food preservation processes Natural preservatives This title will be of great interest to food scientists and engineers based in food manufacturing and in research establishments. It will also be useful to advanced students of food science and technology.

Pay for Play Ronald A. Smith 2010-10-01 In an era when college football coaches frequently command higher salaries than university presidents, many call for reform to restore the balance between amateur

athletics and the educational mission of schools. This book traces attempts at college athletics reform from 1855 through the early twenty-first century while analyzing the different roles played by students, faculty, conferences, university presidents, the NCAA, legislatures, and the Supreme Court. Pay for Play: A History of Big-Time College Athletic Reform also tackles critically important questions about eligibility, compensation, recruiting, sponsorship, and rules enforcement. Discussing reasons for reform--to combat corruption, to level the playing field, and to make sports more accessible to minorities and women--Ronald A. Smith candidly explains why attempts at change have often failed. Of interest to historians, athletic reformers, college administrators, NCAA officials, and sports journalists, this thoughtful book considers the difficulty in balancing the principles of amateurism with the need to draw income from sporting events.
