Department of Homeland Security Bioterrorism Risk Assessment National Research Council 2009-01-03 The mission of Department of Homeland Security Bioterrorism Risk Assessment: A Call for Change, the book published in December 2008, is to independently and scientifically review the methodology that led to the 2006 Department of Homeland Security report, Bioterrorism Risk Assessment (BTRA) and provide a foundation for future updates. This book identifies a number of fundamental concerns with the BTRA of 2006, ranging from mathematical and statistical mistakes that have corrupted results, to unnecessarily complicated probability models and models with fidelity far exceeding existing data, to more basic questions about how terrorist behavior should be modeled. Rather than merely criticizing what was done in the BTRA of 2006, this new NRC book consults outside experts and collects a number of proposed alternatives that could improve DHS's ability to assess potential terrorist behavior as a key element of risk-informed decision making, and it explains these alternatives in the specific context of the BTRA and the bioterrorism threat.

Balanced Scorecard Step-by-Step Paul R. Niven 2002-10-15 This book explains how an organization can measure and manage performance with the Balanced Scorecard methodology. It provides extensive background on performance management and the Balanced Scorecard, and focuses on guiding a team through the step-by-step development and ongoing implementation of a Balanced Scorecard system. Corporations, public sector agencies, and not for profit organizations have all reaped success from the Balanced Scorecard. This book supplies detailed implementation advice that is readily applied to any and all of these organization types. Additionally, it will benefit organizations at any stage of Balanced

Scorecard development. Regardless of whether you are just contemplating a Balanced Scorecard, require assistance in linking their current Scorecard to management processes, or need a review of their past measurement efforts, Balanced Scorecard Step by Step provides detailed advice and proven solutions.

Ask a Manager Alison Green 2018-05-01 'I'm a HUGE fan of Alison Green's "Ask a Manager" column. This book is even better' Robert Sutton, author of The No Asshole Rule and The Asshole Survival Guide 'Ask A Manager is the book I wish I'd had in my desk drawer when I was starting out (or even, let's be honest, fifteen years in)' - Sarah Knight, New York Times bestselling author of The Life-Changing Magic of

Not Giving a F*ck A witty, practical guide to navigating 200 difficult professional conversations Ten years as a workplace advice columnist has taught Alison Green that people avoid awkward conversations in the office because they don't know what to say. Thankfully, Alison does. In this incredibly helpful book, she takes on the tough discussions you may need to have during your career. You'll learn what to say when: · colleagues push their work on you - then take credit for it · you accidentally trash-talk someone in an email and hit 'reply all' · you're being micromanaged - or not being managed at all · your boss seems unhappy with your work · you got too drunk at the Christmas party With sharp, sage advice and candid letters from real-life readers, Ask a Manager will help you successfully navigate the stormy seas of office life.

Marketing Data Science Thomas W. Miller 2015-05-02 Now, a leader of Northwestern University's prestigious analytics program presents a fully-integrated treatment of both the business and academic elements of marketing applications in predictive analytics. Writing for both managers and students, Thomas W. Miller explains essential concepts, principles, and theory in the context of real-world applications. Building on Miller's pioneering program, Marketing Data Science thoroughly addresses segmentation, target marketing, brand and product positioning, new product development, choice modeling, recommender systems, pricing research, retail site selection, demand estimation, sales forecasting, customer retention, and lifetime value analysis. Starting where Miller's widely-praised Modeling Techniques in Predictive Analytics left off, he integrates crucial information and insights that were previously segregated in texts on web analytics, network science, information technology, and programming. Coverage includes: The role of analytics in delivering effective messages on the web Understanding the web by understanding its hidden structures Being recognized on the web - and watching your own competitors Visualizing networks and understanding communities within them Measuring sentiment and making recommendations Leveraging key data science methods: databases/data preparation,

classical/Bayesian statistics, regression/classification, machine learning, and text analytics Six complete case studies address exceptionally relevant issues such as: separating legitimate email from spam; identifying legally-relevant information for lawsuit discovery; gleaning insights from anonymous web surfing data, and more. This text's extensive set of web and network problems draw on rich public-domain data sources; many are accompanied by solutions in Python and/or R. Marketing Data Science will be an invaluable resource for all students, faculty, and professional marketers who want to use business analytics to improve marketing performance.

Comparative International Management

Niels Noorderhaven 2015-05-08 The use of comparisons to explain, analyze and understand social and economic phenomena is recognized as a valuable social science tool. This textbook deals with the differences in management and organization between nations and their effects on multinational enterprises. In comparing management practice across the world, the authors cover themes such as national cultures, diversity and globalization. Students are guided through the key business disciplines, providing a broad introduction to the field and including truly global coverage. With student and instructor friendly resources such as chapter summaries, mini-case scenarios, larger case studies and power-point slides, this book is core reading for students of international business and international management.

Results Bruce A. Pasternack 2005-10-18 Every company has a personality. Does yours help or hinder your results? Does it make you fit for growth? Find out by taking the quiz that's helped 50,000 people better understand their organizations at OrgDNA.com and to learn more about Organizational DNA. Just as you can understand an individual's personality, so too

can you understand a company's type—what makes it tick, what's good and bad about it. Results explains why some organizations bob and weave and roll with the punches to consistently deliver on commitments and produce great results, while others can't leave their corner of the ring without tripping on their own shoelaces. Gary Neilson and Bruce Pasternack help you identify which of the seven company types you work for—and how to keep what's good and fix what's wrong. You'll feel the shock of recognition ("That's me, that's my company") as you find out whether your organization is: • Passive-Aggressive ("everyone agrees, smiles, and nods, but nothing changes"): entrenched underground resistance makes getting anything done like trying to nail Jell-O to the wall • Fits-and-Starts ("let 1,000 flowers bloom"): filled with smart people pulling in different directions • Outgrown ("the good old days meet a brave new world"): reacts slowly to market developments, since it's too hard to run new ideas up the flagpole • Overmanaged ("we're from corporate and we're here to help"): more reporting than working, as managers check on their subordinates' work so they can in turn report to their bosses • Just-in-Time ("succeeding, but by the skin of our teeth"): can turn on a dime and create real breakthroughs but also tends to burn out its best and brightest • Military Precision ("flying in formation"): executes brilliant strategies but usually does not deal well with events not in the playbook • Resilient ("as good as it gets"): flexible, forward-looking, and fun; bounces back when it hits a bump in the road and never, ever rests on its laurels For anyone who's ever said, "Wow, that's a great idea, but it'll never happen here" or "Whew, we pulled it off again, but I'm tired of all this sprinting," Results provides robust, practical ideas for becoming and remaining a resilient business. Also available as an eBook From the Hardcover edition.

Screw It, Let's Do It Sir Richard Branson 2011-08-04 Throughout my life I have achieved many remarkable things. In Screw It, Let's Do It, I will share with you my ideas and the secrets of my success, but not simply because I hope they'll help you achieve your individual goals. Today we are increasingly aware of the effects of our

actions on the environment, and I strongly believe that we each have a responsibility, as individuals and organisations, to do no harm. I will draw on Gaia Capitalism to explain why we need to take stock of how we may be damaging the environment, and why it is up to big companies like Virgin to lead the way in a more holistic approach to business. In Screw It, Let's Do It I'll be looking forwards to the future. A lot has changed since I founded Virgin in 1968, and I'll explain how I intend to take my business and my ideas to the next level and the new and exciting areas - such as launching Virgin Fuels - into which Virgin is currently moving. But I have also brought together all the important lessons, good advice and inspirational adages that have helped me along the road to success. Ironically, I have never been one to do things by the book, but I have been inspired and influenced by many remarkable people. I hope that you too might find a little inspiration between these pages.

"But One Option." Bill MacWithey 2000-06-30

As the war in Vietnam wound down in 1974, Colonel Charlie Donnegan was pissed that the US had lost the war. He was pissed at the government for their inefficiency in running the war. He was a battalion ranger commander, and despite the rest of the military pulling out of Nam, he left a bunch of volunteers there to hurt the enemy as best they could, wherever they could. While his men attacked targets of opportunity in and around Vietnam, Charlie advanced in rank, then resign with a job as assistant director of the CIA. After the Director was killed by a hit and run driver in DC, Charlie was elevated to director. But, that wasn't the end of his plans. Eventually, he ran for president, and knowing a lot of secrets about a lot of people, in and out of government, he won handily. Now, he was in charge. Screw the rest of government. Screw the International Community. He was going to get rid of these fucking terrorists any way he could! Walter Herndon, the Director Charlie Donnegan had hand picked to succeed him, reluctantly went along with the president's plans, even though it worried the hell out of him. Arnold Johnson, Arnie to his men, was a former company

commander under Charlie Donnegan. Arnie was totally devoted to doing the colonels bidding and had no compunctions about killing man woman or child to carry out his orders from his former commander. Arnie and some thirty of the survivors from the rangers left in Vietnam at the end of the war by Charlie had lived for years in the mountains of New Mexico, waiting for whatever tasks the new president assigned them. His name had been Robert Daugherty in the army, but now, as a plant at the CIA to keep an eye on things for the president, his name was Joseph Barger and would play an important role in keeping him informed of the goings on with the director, who Charlie really didn't feel he could trust completely. Joseph Barger was a former drug runner, who joined the army to escape being killed by rival drug dealers. After Vietnam, Charlie had groomed him to a point where he could easily be mistaken for a Harvard graduate or a corporation executive. After successfully taking out a number of foreign targets, Arnie and his men begin assassinating others he disagrees with, like Senators. He blames the assassinations on foreign terrorists. Joseph Barger has been assigned to St. Louis as an employee of First Star Electronics, a CIA owned company. Also, he has a woman agent acting as his wife. She has two children. They are posing as a typical upper-middle-class family, living in St. Charles, a St. Louis suburb. But, something doesn't go as planned. Joseph not only falls in love with her, he falls in love with her two young children. When Joseph and an old partner fly supplies and drop them to Arnie and his men in South America, they are supposed to die from the poison put in the coffee thermos aboard the plane. Arnie is unaware that Joseph doesn't drink coffee. But when his co-pilot friend dies, Joseph figures out he was murdered. He parachutes from the plane, allowing it to fly into the ocean off the coast of Mexico, then it becomes a race to get Betty and her kids out of harm's way. Because Joseph doesn't die as he was supposed to, now he is Arnie's enemy, and Arnie must kill him at any cost. Even Arnie, although he is about as insane a killer as one would find, doesn't realize the president is totally mad. Also, he doesn't realize the president's ultimate plan is to take over the country as a virtual dictator. When Walter Herndon, CIA Director, finally

figures out Charlie is behind the domestic killings, now, he too is the enemy and must be eliminated. An attempt on his life is unsuccessful, but he doesn't know whom to trust. After runn

Web and Network Data Science Thomas W. Miller 2015 Master modern web and network data modeling: both theory and applications. In *Web and Network Data Science*, a top faculty member of Northwestern University's prestigious analytics program presents the first fully-integrated treatment of both the business and academic elements of web and network modeling for predictive analytics. Some books in this field focus either entirely on business issues (e.g., Google Analytics and SEO); others are strictly academic (covering topics such as sociology, complexity theory, ecology, applied physics, and economics). This text gives today's managers and students what they really need: integrated coverage of concepts, principles, and theory in the context of real-world applications. Building on his pioneering Web Analytics course at Northwestern University, Thomas W. Miller covers usability testing, Web site performance, usage analysis, social media platforms, search engine optimization (SEO), and many other topics. He balances this practical coverage with accessible and up-to-date introductions to both social network analysis and network science, demonstrating how these disciplines can be used to solve real business problems.

Adventures of a "Gringo" Researcher in Brazil in the 1960's Mark J. Curran 2012-10-30

Adventures of a Gringo Researcher in Brazil in the 1960s or *In Search of Cordel* is an entertaining and informative account of Professor Currans first foray in Brazil. In this book he tells two stories: the research to collect cordel and, perhaps more importantly, the travel and the adventures of the year in Brazil. The two are inseparable and complement each other. Chapters include Recife and the Northeast, Travels to the interior of the Northeast, research in Brazil's colonial capital of Salvador da Bahia, research and tourism in Rio de Janeiro, trips to the interior of Rio, including Ouro Preto, Congonhas do Campo, and a memorable trip on a wood-burning stern wheeler on the Sao Francisco River in Minas Gerais and Bahia, and finally, research in the Amazon Basin, including both Belem do Para and Manaus. The account is not in academic language but in a colloquial, conversational style. Curran writes as one sitting down with the reader and telling tales of his travels, and perhaps with the author and reader enjoying a caipirinha, or a Brazilian draft beer choppe as they talk.

Guts! Kevin Freiberg 2008-12-10 Kevin and Jackie Freiberg's previous book, *Nuts!*: Southwest Airline's Crazy Recipe for Business and Personal Success, described the unconventional leadership that made Southwest an airline industry dynamo. In *GUTS!*, the Freibergs look at twenty-five gutsy and extraordinarily successful businesses and introduce the chief executives who are creating a new corporate ethos that blows the doors off business-as-usual. Drawing on five years of research, the Freibergs provide a behind-the-scenes look at these intensely focused, passionate, and unconventional leaders and their companies. Among them: • James Blanchard, CEO of Synovus Financial, a financial services giant with more than 16 billion dollars in assets • Roy Spence, Jr., President of GSD&M Advertising, which AdWeek magazine named Southwest Agency of the Year seven times • James Goodnight of SAS, a world leader in intelligence software Although the leaders in the book represent a wide-range of industries, they share a common vision: They see business as a heroic cause and understand that good leadership isn't a matter of position, but of influence. They reject hierarchical rules, rituals,

and expectations, and have replaced in-the-box management with a culture based on passion and innovation. They regard their employees not as “human resources,” but as individuals with unique gifts and talents. And make everyone in the company responsible for the company’s brand and culture. An exciting follow-up to Nuts!, which has sold nearly 500,000 copies in hardcover and paperback, GUTS! proves that it is possible to have fun, live your values, and still make money.
