**Preservation, Sustainability, and Equity**

Erica Avrami 2021-11 Heritage occupies a privileged position within the built environment. Most municipalities in the United States, and nearly all countries around the world, have laws and policies to preserve heritage in situ, seeking to protect places from physical loss and the forces of change. That privilege, however, is increasingly being unsettled by the legacies of racial, economic, and social injustice in both the built environment and historic preservation policy, and by the compounding climate crisis. Though many heritage projects and practitioners are confronting injustice and climate in innovative ways, systemic change requires looking beyond the formal and material dimensions of place and to the processes and outcomes of preservation policy--operationalized through laws and guidelines, regulatory processes, and institutions--across time and socio-geographic scales, and in relation to the publics they are intended to serve. This third

volume in the Issues in Preservation Policy series examines historic preservation as an enterprise of ideas, methods, institutions, and practices that must reorient toward a new horizon, one in which equity and sustainability become critical guideposts for policy evolution.

**Digital and Social Media Marketing**

Nripendra P. Rana 2019-11-11 This book examines issues and implications of digital and social media marketing for emerging markets. These markets necessitate substantial adaptations of developed theories and approaches employed in the Western world. The book investigates problems specific to emerging markets, while identifying new theoretical constructs and practical applications of digital marketing. It addresses topics such as electronic word of mouth (eWOM), demographic differences in digital marketing, mobile marketing, search engine advertising, among others. A radical increase in both temporal and geographical reach is empowering consumers to exert influence on brands, products, and services. Information and Communication Technologies (ICTs) and digital media are having a significant impact on the way people communicate and fulfil their socio-economic, emotional and material needs. These technologies are also being harnessed by businesses for various purposes including distribution and selling of goods, retailing of consumer services, customer relationship management, and influencing consumer behaviour by employing digital marketing practices. This book considers this, as it examines the practice and research related to digital and social media marketing.

**Less is More** Jason Hickel 2020-08-13 'A powerfully disruptive book for disrupted times ... If you're looking for transformative ideas, this book is for you.' KATE RAWORTH, economist and author of Doughnut Economics A Financial Times Book of the Year

Our planet is in trouble. But how can we reverse the current crisis and create a sustainable future? The answer is: DEGROWTH. Less is More is the

wake-up call we need. By shining a light on ecological breakdown and the system that's causing it, Hickel shows how we can bring our economy back into balance with the living world and build a thriving society for all. This is our chance to change course, but we must act now.

'A masterpiece... Less is More covers centuries and continents, spans academic disciplines, and connects contemporary and ancient events in a way which cannot be put down until it's finished.' DANNY DORLING, Professor of Geography, University of Oxford 'Jason is able to personalise the global and swarm the mind in the way that insects used to in abundance but soon shan't unless we are able to heed his beautifully rendered warning.' RUSSELL BRAND 'Jason Hickel shows that recovering the commons and decolonizing nature, cultures, and humanity are necessary conditions for hope of a common future in our common home.' VANDANA SHIVA, author of Making Peace With the Earth 'This is a book we have all been waiting for. Jason Hickel dispels ecomodernist fantasies of "green growth". Only degrowth can avoid climate breakdown. The facts are indisputable and they are in this book.' GIORGIS KALLIS, author of Degrowth 'Capitalism has robbed us of our ability to even imagine something different; Less is More gives us the ability to not only dream of another world, but also the tools by which we can make that vision real.' ASAD REHMAN, director of War on Want 'One of the most important books I have read ... does something extremely rare: it outlines a clear path to a sustainable future for all.' RAOUL MARTINEZ, author of Creating Freedom 'Jason Hickel takes us on a profound journey through the last 500 years of capitalism and into the current crisis of ecological collapse. Less is More is required reading for anyone interested in what it means to live in the Anthropocene, and what we can do about it.' ALNOOR LADHA, co-founder of The Rules 'Excellent analysis... This book explores not only the systemic flaws but the deeply cultural beliefs that need to be uprooted and replaced.' ADELE WALTON

*Sustainable Development in the European Union* 2016 "This Eurostat publication, entitled "Sustainable development in the European Union - A statistical glance from the viewpoint of the UN Sustainable Development Goals", provides an overview of the current situation of the EU and its Member States on sustainable development in relation to the Sustainable Development Goals (SDGs). This publication follows a strictly descriptive approach, presenting a purely statistical picture based on facts and figures. It provides rather a snapshot of the starting position of the EU and its Member States and is not intended as a regular SDG monitoring exercise at EU level. The analysis in this publication is based on a limited number of indicators, which are relevant to the EU perspective and capture the broader objective and ambition of each SDG. Each goal is analysed through two to four indicators. In total, 51 indicators are presented in the report, mainly obtained from the European Statistical System and disseminated by Eurostat. The analysis of Member States' performance and international comparisons focus on the most recent year for each indicator. EU-28 trends over time are also presented, covering the period from 2000 or 2002 up to the most recent year for which data are available (2014 or 2015)."-Back cover.

*Research-led Teaching and Learning in Higher Education* Barbara Zamorski 2000

**Principles of Management** David S. Bright 2023-05-16 Black & white print. Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional

benefit of this text is that specialists in a variety of areas have authored individual chapters.

**Hazard Mitigation Grant Program Desk Reference (FEMA 345)** Federal Emergency Management Agency 2013-02-01 FEMA's Hazard Mitigation Grant Program is a powerful resource in the combined effort by Federal, State, and local government, as well as private industry and homeowners, to end the cycle of repetitive disaster damage. The Robert T. Stafford Disaster Relief and Emergency Assistance Act was passed on November 23, 1988, amending Public Law 93-288, the Disaster Relief Act of 1974. The Stafford Act included Section 404, which established the Hazard Mitigation Grant Program. In 1993, the Hazard Mitigation and Relocation Act amended Section 404 to increase the amount of HMGP funds available and the cost-share to 75 percent Federal. This amendment also encouraged the use of property acquisition and other non-structural flood mitigation measures. In an effort to streamline HMGP delivery, FEMA encourages States to develop their mitigation programs before disaster strikes. States are adopting a more active HMGP management role. Increased capabilities may include: Conducting comprehensive all-hazard mitigation planning prior to disaster events; Providing applicants technical assistance on sound mitigation techniques and hazard mitigation policy and procedures; Coordinating mitigation programs through interagency teams or councils. Conducting benefit-cost analyses; and Preparing National Environmental Policy Act reviews for FEMA approval. States that integrate the HMGP with their frequently updated State Administrative and Hazard Mitigation Plans will create cohesive and effective approaches to loss reduction. This type of coordinated approach minimizes the distinction between "predisaster" and "post-disaster" time periods, and instead produces an ongoing mitigation effort. Hazard mitigation is any sustained action taken to reduce or eliminate long-term risk to people and property from natural hazards and their effects. A key purpose of the HMGP is to ensure that the opportunity to take critical mitigation measures to protect life and property from future disasters is not lost during the recovery and reconstruction process following a disaster.

Program grant funds available under Section 404 of the Stafford Act provide States with the incentive and capability to implement mitigation measures that previously may have been infeasible. The purpose of this Desk Reference is to: Provide comprehensive information about FEMA's Hazard Mitigation Grant Program (HMGP); Increase awareness of the HMGP as an integral part of statewide hazard mitigation efforts; and Encourage deeper commitments and increased responsibilities on the part of all States and communities to reduce damage and losses from natural disasters. This Desk Reference is organized to simplify program information and assist the reader with practical guidance for successful participation in the program. Lists of program-related acronyms and definitions are included, along with appendices that amplify selected aspects of the HMGP. This Desk Reference is organized into 14 sections, each of which presents a major HMGP subject area. In each section, information is presented on the right side of the page. In several sections, job aids containing supplemental material are provided. The job aids for each section can be found at the end of the section. At the front of each section, there is a detailed table of contents to help you locate specific information.

### **Fundamentals of Genocide and Mass Atrocity Prevention 2016**

**Overtourism** Claudio Milano 2019-06-07 This book examines the evolution of the phenomenon and explores the genesis of overtourism and the system dynamics underlining it. The 'overtourism' phenomenon is defined as the excessive growth of visitors leading to overcrowding and the consequential suffering of residents, due to temporary and often seasonal tourism peaks, that lead to permanent changes in lifestyles, amenities and well-being. Enormous tensions in overtourism affected destinations have driven the intensification of policy making and scholarly attention toward seeking antidotes to an issue that is considered paradoxical and problematic. Moving beyond the 'top 10 things you can do about overtourism', this book examines the evolution of the phenomenon and explores the genesis of overtourism as well as the system dynamics underpinning it. With a rigorous scientific approach, the book uses systems-thinking and

contemporary paradigms around sustainable development, resilience planning and degrowth; while considering global economic, socio-political, environmental discourses. Researchers, analysts, policy makers and industry stakeholders working within tourism as well as those within the private sector, community groups, civil society groups and NGOs will find this book an essential source of information.

### **The Psychology of Economic Decisions**

Isabelle Brocas 2003 Psychologists have a long tradition of studying human behavior, strengths and weaknesses, biases and limitations. Economists have constructed normative frameworks that capture the most important elements of human decision-making and developed powerful tools to determine individual and strategic choices in a variety of situations. Only recently have their strengths been combined and economic models enriched with key ingredients found in psychological studies. This volume covers four of the most important themes in this interdisciplinary field: feelings, inconsistencies, limitations and biases. Each chapter contributes to a more comprehensive and accurate modelling and description of human behavior. Its four parts cover: the origins, formation, and evolution of beliefs; consistency, commitment, and intertemporal separability of dynamic choices; attention, preference formation, and risk evaluation in limited cognition; and affective behaviour, specifically the role of emotions in decision making.

### **Capital Markets and Portfolio Investment** 1996

*Tax Morale What Drives People and Businesses to Pay Tax?* OECD 2019-09-11 Unlocking what drives tax morale – the intrinsic willingness to pay tax – can greatly assist governments in the design of tax policies and their administration, particularly in developing countries where compliance rates are low. This report builds on previous OECD research to identify some of the key socio-economic and institutional drivers of tax morale across developing countries, and seeks to test for evidence of the social contract by examining the impact of public services on tax morale. It also uses new data on tax certainty as an entry point to explore tax morale in businesses, where existing research is very

limited. Finally, the report identifies a range of factors related to the tax system that may affect business decision making, how they vary across regions, and suggests some areas for future research. Overall, the report provides a range of suggestions for further work, and how tax morale considerations can be integrated into holistic tax compliance strategies.

### **Strategies for Work Zone Transportation Management Plans** Leverson Boodlal 2020

One of the ways a state department of transportation or other transportation agency can address work zone safety and other impacts is to develop and implement a Transportation Management Plan (TMP). The TRB National Cooperative Highway Research Program's NCHRP Research Report 945: Strategies for Work Zone Transportation Management Plans provides a practitioner-ready guidebook on how to select and implement strategies that improve safety and traffic operations in roadway construction work zones. Supplemental materials to the report include NCHRP Web-Only Document 276: Evaluating Strategies for Work Zone Transportation Management Plans; fact sheets on ramp meter, reversible lane, and truck restrictions; and guidebook appendices.

**Rail-highway Crossing Safety** 1994 This Action Plan presents a multi-faceted, multi-modal approach for improving safety at our nation's highway-rail crossings and for the prevention of trespassing on the rights-of-way of our nation's railroads. It is multi-faceted in that it presents enforcement, engineering, education, research, promotional and legislative initiatives addressing crossings of both light and conventional rail rights-of-way by public and private streets and highways. The objectives were to reduce the number of highway-rail crossing accidents and casualties while not impeding, but facilitating, the contribution potential of the highway and rail infrastructure on the nation's economy.

**Principles of Tourism Management** Johanna Muller 2016-06-03 There has been a recent upsurge in the tourism sector across the globe. This has facilitated the progress of tourism industry and its contribution to the economy of the world. This book is a collection of recent theories and concepts in the field. It covers a diverse array of topics such as cultural tourism,

sustainable tourism, impact of economic and non-economic factors on tourism, importance of marketing, etc. The aim of this text is to bring forth the most innovative case studies to provide the readers with a truly global overview of the subject. It will serve as a resource guide for students, academicians, professionals and anyone else associated with the tourism sector.

**Measuring Regional Authority** Liesbet Hooghe 2016 This is the first of five ambitious volumes theorizing the structure of governance above and below the central state. This book is written for those interested in the character, causes, and consequences of governance within the state and for social scientists who take measurement seriously. The book sets out a measure of regional authority for 81 countries in North America, Europe, Latin America, Asia, and the Pacific from 1950 to 2010. Subnational authority is exercised by individual regions, and this measure is the first that takes individual regions as the unit of analysis. On the premise that transparency is a fundamental virtue in measurement, the authors chart a new path in laying out their theoretical, conceptual, and scoring decisions before the reader. The book also provides summaries of regional governance in 81 countries for scholars and students alike. Transformations in Governance is a major new academic book series from Oxford University Press. It is designed to accommodate the impressive growth of research in comparative politics, international relations, public policy, federalism, environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions, down to subnational governments, and side-ways to public-private networks. It brings together work that significantly advances our understanding of the organization, causes, and consequences of multilevel and complex governance. The series is selective, containing annually a small number of books of exceptionally high quality by leading and emerging scholars. The series targets mainly single-authored or co-authored work, but it is pluralistic in terms of disciplinary specialization, research design, method, and geographical scope. Case studies as well as comparative studies, historical as well as contemporary studies, and studies with a national, regional, or

international focus are all central to its aims. Authors use qualitative, quantitative, formal modeling, or mixed methods. A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style. The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina, Chapel Hill, and the VU Amsterdam, and Walter Mattli of the University of Oxford.

**The Empathy Exams** Leslie Jamison 2014-06-05 The subjects of this stylish and audacious collection of essays range from an assault in Nicaragua to a Morgellons meeting; from Frida Kahlo's plaster casts to a gangland tour of LA. Jamison is interested in how we tell stories about injury and pain, and the limits that circumstances, bodies and identity put on the act of describing.

**Dragons at Crumbling Castle** Terry Pratchett 2014-09-11 Dragons have invaded Crumbling Castle, and all of King Arthur's knights are either on holiday or visiting their grannies. It's a disaster! Luckily, there's a spare suit of armour and a very small boy called Ralph who's willing to fill it. Together with Fortnight the Friday knight and Fossfiddle the wizard, Ralph sets out to defeat the fearsome fire-breathers. But there's a teeny weeny surprise in store . . . Fourteen fantastically funny stories from master storyteller Sir Terry Pratchett, full of time travel and tortoises, monsters and mayhem! 'So funny I dropped my spoon laughing!' - King Arthur

**The Historic Fort Worth Stockyards** Carolyn Elizabeth Brown 2021-06-21 With breathtaking color photography and absorbing historical detail, Carolyn Brown and J'Nell Pate tell the story of the Fort Worth Stockyards, the place that earned the city the nickname "Cowtown." From the rise of the stockyards as a vital railhead for the ranching industry through the postwar decline and rebirth as a National Historic District, first-time visitors and long-time acquaintances will find this chronicle engaging and enjoyable. Brown and Pate accompany readers through the early days of settlement, the cattle drives that saw thousands of head of livestock going up the trail through what was then little more than a frontier outpost, and the rising tide of industry that accompanied the arrival of the railroads. Continuing after World War II when the changes in the livestock

industry led to decline of their importance, the stockyards, once a bustling, vital part of the regional culture and economy, fell into slow decay. In 1976, citizens banded together to create a National Historic District. Today, the Fort Worth Stockyards attract thousands of visitors from all over the world with restaurants, entertainment venues, and the world's only twice-daily longhorn cattle drive along East Exchange Avenue. Brown's lens captures the vibrancy of today's stockyards while Pate's research depicts the drama of the area's rise, fall, and rebirth. The Historic Fort Worth Stockyards provides a visual and factual tour of an unforgettable place where heritage is celebrated and preserved.

*Tourism Supply Chain Management* Haiyan Song 2012-03-12 Fierce global competition in the tourism industry is now focused on integral parts of supply chains rather than on individual firms. The highly competitive environment has forced tourism firms to look for ways to enhance their competitive advantage. Tourism products are often viewed by consumers as a value-added chain of different service components and identifying ways to effectively manage the interrelated tourism business operations will enable tourism firms to better meet customer needs and accomplish business goals thus maintaining competitive advantage over their equally efficient rivals. This significant and timely volume is the first to apply supply chain management theories and practices in the context of tourism. By doing so the book offers insight into the relationships between tourism enterprises, how coordination across organizations can be effectively achieved and how business performance can be improved. It provides comprehensive and systematic coverage of modern supply chain management concepts and methodologies applied to the tourism and hospitality industries. The text covers key issues and principles including: marketing and product development, demand forecasting, supplier selection and management, distribution channels, capacity management, customer relationship management, tourism supply chain competition and coordination, and e-tourism. The book combines essential theory and comparative international examples based on primary research to show challenges and

opportunities of effective tourism supply chain management. This text is essential for final year undergraduate and postgraduate students studying Tourism Management, Tourism Planning and Tourism Economics.

Doing Work Based Research Carol Costley  
2010-03-25 With the growth of practitioner research, this book leads the way by addressing key issues faced by 'insider researchers' – those doing research projects in the organizations and communities in which they themselves work, or where they are already familiar with the setting. The authors explore the implications of these research contexts, and discuss approaches and methodologies that researchers in these contexts might adopt, with a particular focus on ethics - one of the key concerns for students undertaking a research project of this type.

*Shadow Education* Mark Bray 2012-05-01 In all parts of Asia, households devote considerable expenditures to private supplementary tutoring. This tutoring may contribute to students' achievement, but it also maintains and exacerbates social inequalities, diverts resources from other uses, and can contribute to inefficiencies in education systems. Such tutoring is widely called shadow education, because it mimics school systems. As the curriculum in the school system changes, so does the shadow. This study documents the scale and nature of shadow education in different parts of the region. Shadow education has been a major phenomenon in East Asia and it has far-reaching economic and social implications.

**The Last Dragonslayer** Jasper Fforde  
2012-10-02 In the good old days, magic was indispensable—it could both save a kingdom and clear a clogged drain. But now magic is fading: drain cleaner is cheaper than a spell, and magic carpets are used for pizza delivery. Fifteen-year-old foundling Jennifer Strange runs Kazam, an employment agency for magicians—but it's hard to stay in business when magic is drying up. And then the visions start, predicting the death of the world's last dragon at the hands of an unnamed Dragonslayer. If the visions are true, everything

will change for Kazam—and for Jennifer. Because something is coming. Something known as . . . Big Magic.

*The Traveller's Tree* Patrick Leigh Fermor 2010-10-10 In this, his first book, Patrick Leigh Fermor recounts his tales of a personal odyssey to the lands of the Traveller's Tree - a tall, straight-trunked tree whose sheath-like leaves collect copious amounts of water. He made his way through the long island chain of the West Indies by steamer, aeroplane and sailing ship, noting in his records of the voyage the minute details of daily life, of the natural surroundings and of the idiosyncratic and distinct civilisations he encountered amongst the Caribbean Islands. From the ghostly Ciboneys and the dying Caribs to the religious eccentricities like the Kingston Pocomaniacs and the Poor Whites in the Islands of the Saints, Patrick Leigh Fermor recreates a vivid world, rich and vigorous with life.

**Preserving the Desert** Lary M. Dilsaver 2016 National parks are different from other federal lands in the United States. Beginning in 1872 with the establishment of Yellowstone, they were largely set aside to preserve for future generations the most spectacular and inspirational features of the country, seeking the best representative examples of major ecosystems such as Yosemite, geologic forms such as the Grand Canyon, archaeological sites such as Mesa Verde, and scenes of human events such as Gettysburg. But one type of habitat--the desert--fell short of that goal in American eyes until travel writers and the Automobile Age began to change that perception. As the Park Service began to explore the better-known Mojave and Colorado deserts of southern California during the 1920s for a possible desert park, many agency leaders still carried the same negative image of arid lands shared by many Americans--that they are hostile and largely useless. But one wealthy woman--Minerva Hamilton Hoyt, from Pasadena--came forward, believing in the value of the desert, and convinced President Franklin D. Roosevelt to establish a national monument that would protect the unique and iconic Joshua trees and other desert flora and fauna. Thus was Joshua Tree National Monument officially established in 1936, with the area later expanded in 1994 when it became Joshua Tree National Park. Since

1936, the National Park Service and a growing cadre of environmentalists and recreationalists have fought to block ongoing proposals from miners, ranchers, private landowners, and real estate developers who historically have refused to accept the idea that any desert is suitable for anything other than their consumptive activities. To their dismay, Joshua Tree National Park, even with its often-conflicting land uses, is more popular today than ever, serving more than one million visitors per year who find the desert to be a place worthy of respect and preservation. **Higher education** Great Britain: Department for Business, Innovation and Skills 2011-06-28 This White Paper sets out the government's policies for the reform of higher education. The reforms seek to tackle three challenges (i) Putting higher education on a sustainable footing; (ii) Seeking to deliver a better student experience - that is, improvements in teaching, assessment, feedback and preparing the student for the world of work; (iii) Pushing for higher education institutions to take more responsibility for increasing social mobility. The Paper is divided into six chapters, with an annex. Chapter 1: Sustainable and fair funding; Chapter 2: Well-informed students driving teaching excellence; Chapter 3: A better student experience and better-qualified graduates; Chapter 4: A diverse and responsive sector; Chapter 5: Improved social mobility through fairer access; Chapter 6: A new, fit-for-purpose regulatory framework. By shifting public spending away from teaching grants and towards repayable tuition loans, the government believes higher education will receive the funding it needs whilst making

savings on public expenditure. The reforms aim to deliver a more responsive higher education sector in which funding follows the decisions of learners and successful institutions are freed to thrive. Also, creating an environment in which there is a new focus on the student experience and the quality of teaching and in which further education colleges and other alternative providers are encouraged to offer a diverse range of higher education provision. The Government, through the Office for Fair Access (OFFA), will be introducing a National Scholarship Programme and will also increase maintenance grants and loans for nearly all students. New Technology Innovation Centres will also be rolled out followed by publication of an innovation and research strategy, exploring the roles of knowledge creation, business investment, skills and training.
